

### Q1. Program to print

-(I) Simple Interest code:

```
class SI
{
    public static void main(String []args){

        int p=1000,n=1;

        float r= 12.0f,ans;

        ans = (p*r*n)/100;

        System.out.println("SI:"+ans);

    }
}
```

The screenshot shows a Windows command prompt window titled "C:\Windows\System32\cmd.exe". The user is in the directory "F:\SEM-3\JAVA\Tutorial 2". The commands entered and their outputs are as follows:

```

(II) Compound Interest code:

```
class CI
```

```
{
```

```

public static void main(String []args){

    int p = 5,r=3,n=6,t =1;

    double Area;

    Area = p*(1+r/n)^(n*t);

    System.out.println("Area of Circle:"+Area);

}

}

```

The screenshot shows a Windows command prompt window titled "C:\Windows\System32\cmd.exe". The text inside the window is as follows:

{

    public static void main(String []args){

        float r = 3.0f;

        double ans;

        ans = (3.14 *r * r);

        System.out.println("Area of Circle:"+ans);

    }

}

```

}
